Can I prevent Pong Research iPad case from emitting 3G radiation?

2020/02/09

Hi Kylie! Pong Research has made a real break-through in the world of cases! While most of iPad and iPhone case manufacturers cannot do that, Pong Research did. So you would ask: what they did? They have made the unique iPad case that is able to prevent your iPad from fall damage while in addition it does not block the signal of embedded 3G antenna. Cool, right? But there is another thing to consider. In fact, even two things. The first one is that this Pong Research case makes 3G signal to redistribute the radiation resulting in it is emitted from the case owner to everyone around. The second thing is that the 3G signal of the case owner would be much stronger and suppress other 3G signals' power. What do you think about it? If you want to end this relentless mess once and for all, you need to effectively block the 3G signal band. Thus use Pong Research case jammers because any of them can definitely block 3G frequency band in its specified jamming radius.

## **mobile phone jammer Lyles**
